OBJECTIVE

2nd-year B.Tech CSE student at SRM University AP (Minor in **Management**) with internship experience in business operations and ongoing ML research in customer churn prediction. Skilled in full-stack development (MERN), Python, and DSA. Seeking a Software Engineer Internship to apply development and problem-solving skills in real-world projects.

WORK EXPERIENCE

Research Intern – Customer Churn Prediction using ML | SRM University AP [May 2026] – Present

- Building ML classification models to predict customer churn across multiple sectors using historical datasets; performing feature engineering and EDA to extract actionable insights.
- Evaluating model performance and generating data-driven retention recommendations using Pandas, NumPy, Scikit-Learn, and Matplotlib.

Business & Operations Intern | Sree Satyata Consulting, India May 2024 – Dec 2025

- Prepared MIS-level reports and data tracking dashboards; analyzed client data to support operational decision-making.
- Identified process gaps and contributed improvement recommendations for real-world business scenarios.

EDUCATION

B.Tech – Computer Science & Engineering, SRM University AP 2024 – 2028 (Expected)

Minor Degree in Management | Coursework: Data Structures & Algorithms, Python, DBMS, Full Stack Development, Business Negotiations, DAA, Web Technologies

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, SQL

Web & Frontend: HTML, CSS, React.js, TailwindCSS

Backend & DB: Node.js, Express.js, MongoDB, MySQL, Monogoose, REST APIs

Tools: Git, GitHub, VS Code, Postman, Vite, React Query,

Pandas, NumPy, Scikit-Learn

Core CS: Data Structures & Algorithms, DBMS, OOP, System Design

Soft Skills: Analytical Thinking, Team Collaboration, Problem Solving, Business Communication, Negotiation

CERTIFICATIONS

MongoDB Associate Developer Certification (Node.js) – MongoDB University 2026

PROJECTS

Business Analysis Agent Python · Data Analysis · System Design | SWEyam Hackathon, 2024

- Built an AI-powered system transforming raw business data into structured, actionable insights; designed explainable analytical logic to flag inefficiencies and proposed scalable accounting-tool integrations.

VillageConnect React.js · Node.js · MongoDB · JWT · TailwindCSS | 2025

- Full-stack platform empowering rural communities across agriculture, healthcare, education, and grievance management with JWT-based role access (Villager / Provider / Admin) and an admin dashboard with React Query.

HealthQueue – Smart Healthcare Scheduling DSA · Algorithms | 2024

- Priority-queue-based patient scheduling system dynamically optimizing urgency-based handling and reducing hospital wait times through algorithmic workflow simulation.

Resume Shortlisting System Python · Pandas | 2024

- Automated screening pipeline ranking applicants via keyword-matching algorithms; reduced manual effort at scale with structured filtering and bulk-processing logic.

ACHIEVEMENTS & ACTIVITIES

- Recognized for high-impact **Elevator Pitch** at a business event — demonstrated clarity, structure, and persuasive communication.
- Applied structured **negotiation strategies** (value creation, trade-off analysis) in Management coursework simulations to achieve effective outcomes.
